# Corality consulting services

Corality is a full service analytical consulting firm. We assist clients with everything from the initial review of current processes to the development of tailored analytical tools needed in the decision making process. We offer analytical consulting and training services in a large number of areas.

## Investments

Sophisticated analysis of investment opportunities is critical to business success in all sectors. Corality works closely with its clients to forecast and analyse different opportunities and their expected returns in order to maximise the value of our clients' investments.

## Corporate Finance

In the field of Corporate Finance, Corality assists its clients in maximising corporate value while managing corporate risk. We provide clients with the tools they need to develop an informed view of the risks and rewards of any potential situation.

## Project Finance

Corality's expertise in Project Finance and Public Private Partnership (PPP) extends across all major industry sectors. Our experienced project finance advisory team can inject world class expertise and strengthen your team structure at any stage of your project's life cycle. We will help you optimise the success of your project and take you all the way to financial close.

## Private Equity

Corality's service offering to the Private Equity sector includes modelling of our clients' portfolio investments and model audit of financial models prior to transactions. Our tailored approach frees up internal resources and allows our clients to focus on new potential transactions.

## Risk

Understanding and reducing financial modelling risk is a critical part of corporate governance. Corality's offering in risk management covers a range of aspects including financial modelling risk, validation of actuarial and financial models, analysis of correlated business drivers and scenario analysis.

## Strategy

Well defined strategies are essential for companies to survive in today's rapidly changing business environment. Corality provides world class analytical tools, techniques and independent advice in evaluating key performance indicators (KPIs), identifying key drivers and understanding the nature of the underlying business risks.

## Operations

Corality's consultative approach allows us to identify and solve bottlenecks, technical frustration, information management and reporting issues through the use of interactive workshops and the development of tailored analytical tools.

## Commercial

Sophisticated evaluation of commercial decisions is crucial to ensure long term profitability. Corality's consultants assist clients by developing the financial analysis models needed to identify key drivers of the commercial arrangement and the impact of potential scenarios.

## Accounting

Corality's team of financial experts includes chartered accountants and taxation specialists. We work with our clients' existing financial advisers to provide seamless, tailored and fully integrated solutions for our clients' business needs.

# The Corality advantage

Corality specialises in financial modelling, advisory, model audits and training. We challenge traditional accounting and management consulting firms through our specialised and client-focused approach to analytical consulting.

## Team of experts – we are thought leaders in the world of analytical consulting

The Corality team consists of analytical consultants with backgrounds in banking, strategy, accounting, actuarial, mathematics, engineering, IT and physics. We understand the requirements of multi-billion dollar companies as well as the requirements of small and medium-sized firms and we tailor our services to suit each client and project.

## Our clients – we work with organisations of all sizes globally

Corality's client base spans a wide range of industries; from banking and finance, construction and development through to retail and corporate clients. The majority of Corality's clients are based in Europe, the United States, Asia, the Middle East and Australia.

## Tailored approach – we put you in control

Corality believes in a consultative approach to project management and problem solving. Our work structure and processes are flexible – we work with each client to develop tailored solutions and ensure smooth project delivery and fast turnaround. We offer flexible engagement terms, fixed fees and hourly rates. We tailor the scope of the project to suit your budget, putting you in total control.

### Best practice modelling

We developed the SMART modelling methodology

Corality is a world leader in best practice modelling. Our internationally applauded best practice financial modelling methodology, SMART, meets the needs of analysts, decision-makers, financiers, management and financial stakeholders. It decreases model risk and results in robust, transparent and user-friendly models suitable for analysis by all stakeholders.

### Financial modelling services

Are your financial models up to scratch?

Corality's extensive modelling experience and best practice financial modelling methodology empowers us to deliver market leading modelling services. Our financial models increase modelling productivity, decrease modelling risk and increase the confidence of all users. We put you back in control of the decision making process.

### Model audit services

How much would a modelling error cost you?

The Corality audit team are expert model auditors with wide-ranging experience across all major sectors. Our comprehensive model audit services have been relied upon by global banks, company boards and major construction firms. Our world wide clients trust us with multi-billion dollar transactions and critical investments. Corality offers a consultative approach, highly experienced staff, rigorous procedures and efficient communication of results.

### Training services

We are your one-stop-shop training provider

Corality can provide you with an outstanding solution to all your training needs. Our comprehensive suite of financial modelling, Excel/VBA, Project Finance, Corporate Finance and industry specific courses will provide your team with the skills needed to work more efficiently and ensure their ongoing development and success. We deliver public and in-house training courses globally. Our public courses are scheduled regularly across Europe, the United States, Canada, Africa, Australia and Asia.
